Software, Security, and Resiliency

Paul Nielsen
SEI Director and CEO

Dr. Paul D. Nielsen is the Director and CEO of Carnegie Mellon University's Software Engineering Institute. Under Dr. Nielsen's leadership, the SEI has expanded its research, doubled its staff and increased its impact in the software engineering community. The SEI now has over 500 valued partnerships with organizations extending its influence globally. Prior to joining SEI in 2004, he served in the U.S. Air Force, retiring as a major general and commander of Air Force research after 32 years of distinguished service. Nielsen is a member of the US National Academy of Engineering (NAE) and a Fellow of both the American Institute of Aeronautics and Astronautics (AIAA) and the Institute for Electrical and Electronics Engineers (IEEE).

Report Documentation Page			Form Approved OMB No. 0704-0188	
<p>Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.</p>				
1. REPORT DATE FEB 2012	2. REPORT TYPE	3. DATES COVERED 00-00-2012 to 00-00-2012		
4. TITLE AND SUBTITLE Software, Security, and Resiliency		5a. CONTRACT NUMBER

Complex Systems at the SEI

The SEI is at the nexus of systems and complexity:

- We study them side-by-side
- For 25 years, we've been helping engineers design and manage software systems
- It's our job to "ring the bell" on the importance of managing complexity

We also appreciate risk and the importance of managing it

- Continuous risk management
- Mosaic suite of risk management tools
- Multi-view models
- Mission Success in Complex Environments

Key Principles of Resiliency (1)

Resilience is the ability to provide and maintain an acceptable level of service in the face of faults and challenges to normal operation.

- At SEI, both organizational and software:
- Resilience Maturity Model (RMM)
- Security Quality Requirements Engineering (SQUARE)
- **security built in**
- **failure scenarios understood, planned for**

resilience

- redundancy is provided for in key areas
- capability remains available under adverse conditions

Continuity

A key aim of resiliency (and managing operational risk)

Business Functions:

- Developing and executing continuity plans, recovery plans, and restoration plans

IT Function:

- Developing, implementing, and managing processes to deliver IT services and manage IT infrastructures

Resiliency Maturity Model (1)

What is CERT-RMM?

CERT-RMM is a maturity model for managing and improving operational resilience.

- Guides implementation and management of operational resilience activities
- Converges key operational risk management activities: security, business continuity/disaster recovery, and IT operations
- Defines maturity through capability levels (like CMMI)
- Improves confidence in how an organization responds in times of operational stress

Connecting the Dots

Today's presentations include:

Understanding and coping with complexity & cyber security

- CMMI-SVC: The Strategic Landscape for Service
- Software Acquisition Program Dynamics
- Architectural Implications of Cloud Computing
- The Insider Threat: Lessons Learned from Actual Insider Attacks

Dealing with the smart grid, resiliency and software development

- Smart Grid Maturity Model
- Agile Development and Architecture: Understanding Scale and Risk
- Measuring Operational Resilience
- Team Software Process (TSP)
